Swedish education for sustainable fashion

In Sweden, it is noticeable that the demand for competent personnel in sustainable fashion is increasing. For those who want the job of the future, there are a multitude of different educational options. [Read more](#)

TOWARDS A MORE SUSTAINABLE FASHION IN ROMANIA

In recent months there have been several fashion events in Romania that have attracted the attention of the fashion professionals and the local media. Some were organised in the spirit of environmental responsibility, and all had at least one moment that focused on the importance of sustainability.

HOW CAN EUROPE IMPROVE ITS FASHION INDUSTRY

Europe has a rich history and presence in the fashion industry, with cities like Paris, Milan, and London being global fashion capitals. However, like any industry, there is always room for improvement. [Read more](#)

Digitalization in Fashion

Digitalization and its role to sustainable fashion

Digitalization has dominated most of the industrial sectors nowadays, further accentuated by COVID-19 pandemic. Fashion industry is now undergoing a rapid, transformative period spearheaded by an increasing digitalization in its processes, expanding to all fashion sectors: design, production, supply and retail chain. [Read more](#)

Transforming fashion with 3D printing

Fashion is a constantly evolving field that embraces creativity, innovation, and individuality. 3D printing has become one of the most exciting technologies in the textile and fashion industry, triggering a revolution in the way we design, produce, and experience [hashtag#fashion](#). 3D printing in fashion is not just a trend; it's a real transformation in how we conceive clothing and accessories.

The FEA-VEE project is preparing all the necessary material on this topic to improve the offer of educational institutions across Europe. [Read more](#)

FEA-VEE on the EYE Event!

June 22, 2023

The European Youth Event brings together at the European Parliament in Strasbourg and online thousands of young people from all over the European Union and the world, to share and shape their ideas on Europe's future. It is a unique opportunity for 16 to 30 year olds to interact, inspire each other and exchange their views with experts, activists, influencers and decision-makers, right in the heart of European democracy. EYE2023, the fifth edition of the event, took place on 9 and 10 June and featured both in-person and hybrid activities in Strasbourg. During the event, participants took part in activities co-created with institutions, international organizations, civil society, youth organizations and participants themselves, offering a space for discussions and networking.

The EYE strives to promote equality, inclusiveness and sustainability with a strong commitment to accessibility for everyone. The aim is to accommodate the needs of all participants and to implement solutions that make the event sustainable and environmentally friendly. In 2021, the EYE obtained the ISO 20121 certification for sustainable event management, which will be renewed for EYE2023.

FEA-VEE proudly participated in the "Green Excellence" panel discussion and had the opportunity to present the content of the project but also to address serious issues such as fast fashion and the impact of consumption habits established in European countries.

In the Winston Churchill 200 room, where the debate between the CoVe projects on Green Excellence took place, the audience undoubtedly showed a keen interest in the FEA-VEE project and actively shared their agreement on the need for change regarding consumer habits.

Exciting International Learning Experience!

Last week, our talented textile engineering students from UPC Terrassa, a proud partner of the FEA-VEE project, embarked on a transformative journey at the Hacktex bootcamp program held at the prestigious University of Borås in Sweden.

From November 13 to 17, our students delved deep into the world of smart textiles, gaining invaluable insights and honing their skills in this cutting-edge field. The immersive experience provided them with a unique opportunity to explore the intersection of technology and textiles, paving the way for innovation in the future. [Read more](#)
